a better way to macramé

Online Class - Macramé Lace Bracelet Materials List

Tools & Supplies

Macramé Board - I recommend a "Macramé Project Board" made by Pepperell Crafts (available at micro-macramejewelry.com). Leave the plastic on so the fibers don't shed on your clothes. Another good choice is an 11" X 17" unframed cork bulletin board. A temporary board can be made by gluing two pieces of foam core together (be careful of the pins poking through the back). Make sure that your board is tall enough to rest in your lap while leaning up against your desk.

Quilting Pins - Sturdy large sewing or quilting pins. Small size (1.25") T-pins are also good but the larger (1.75") size T-pins are too thick and will damage the cord.

Crewel Embroidery Needle - Size #2 or a similar medium size.

Scissors - Small and sharp for getting into tight places.

Clear Nail Polish - (optional on some projects) To secure finishing knots.

"Fray Check" - (optional) This is used to stiffen the end of the cord, making it easier to thread beads with small holes. Let it dry for 10 - 15 minutes for best results.

Video Class Materials

Macrame Cord

18 gauge Nylon Cord (S-Lon cord available at micro-macramejewelry.com) -

- Outer Chains & Loop - 1 @ 100" (Main color)
- Outer Chains & Loop - 1 @ 50" (Secondary color, will be mostly hidden)
- Inner Chains - 2 @ 70"
